

STUDENT HEALTH SERVICES

Health services are an integral part of comprehensive school improvement, assisting all students to increase learning, achievement, and performance. Health services coordinate and support existing programs to assist each student in achievement of physical, mental and social well being. Student health services ensure continuity and create linkages between school, home, and community service providers. The school district's comprehensive school improvement plan, needs, and resources determine the linkages.

The superintendent or designee, in conjunction with the Health Advisory Committee, will develop administrative regulations implementing this policy. The superintendent will provide a written report on the role of health services in the education program to the board annually.

The school district will annually notify parents of physical exams or screenings conducted on students except for vision, hearing or scoliosis screenings. Parents will have the option of refusing consent for those screenings (not including vision, hearing or scoliosis screenings).
