

## PROGRAM FOR TALENTED AND GIFTED STUDENTS - CRITERIA

Multiple criteria are used to nominate, screen, and identify students who are eligible for gifted education services. Students new to the District will be screened for possible programming throughout the year. Additional reconsideration processes will be followed when requested.

The demographics of the school district will be represented in the population of students identified for the talented and gifted programs.

Specific grade-level identification processes, program goals, curriculum outcomes, and program assessment procedures are on file with the Office of Advanced Programming.
