

## BUILDINGS AND SITES SURVEYS

Upon the recommendation of the Superintendent, the Board of Education may engage the services of consultants or other personnel to study the needs of the school district's buildings and sites in providing the education program. The results of these services will be considered in the planning and decision making about the improvement of existing facilities or the construction and/or acquisition of new facilities.

To the extent possible, the need for such special studies shall be anticipated in advance so budgetary provisions can be made.

It is the responsibility of the Superintendent, in conjunction with the Director of Operations, to make a recommendation to the Board regarding the need for such services and who should perform such services for the Board.
